Johan Klenner

CLOUD SECURITY SPECIALIST

Security specialist working across Microsoft Sentinel, Defender XDR, Entra ID and Intune in enterprise environments delivered as a 24/7 managed SOC service. Experienced across the detection lifecycle, log ingestion, detection tuning, threat hunting, and incident response from triage to root-cause resolution. Strong identity foundation from large-scale IAM/IGA implementations, including operating an Omada and MIM platform covering approximately 35,000 identities. Skilled at translating risk into clear, actionable direction for both engineers and executives. BSc in Computer and Systems Sciences with a specialization in information security. CISSP Associate.

EXPERIENCE

2025 – present

Asurgent

Technical Security Advisor

Scope & Advisory

Primary security advisor for 8+ enterprise customer tenants in a 24/7 managed SOC service. Own the technical security relationship end to end - recurring customer briefings, posture reviews, and prioritised remediation roadmaps for both engineering teams and executive stakeholders.

Detection Tuning & Threat Hunting

Alert triage, root-cause analysis and threat hunting. Tuning and development of detection rules, mapping detections and observed activity to MITRE ATT&CK techniques, SOAR playbook maintenance.

Log Ingestion & Cost Optimization

Onboarded log sources into Microsoft Sentinel, including forwarder VMs and log forwarding for third-party firewalls, expanding telemetry coverage and improving data quality for detection.

Incident Response

Managed and coordinated incident response activities, including investigation, containment, and remediation of security incidents such as credential theft and endpoint compromise. Post-incident reporting and remediation guidance to customer stakeholders.

Identity & Endpoint Security

Entra ID conditional access design, identity protection tuning, and Intune/MDE hardening across enterprise tenants.

2022 – 2025

Knowit Cybersecurity & Law

IT Security Specialist / IAM Consultant

Administrative Manager & Developer - Svenska Kyrkan

Operated and developed the IGA platform (Omada Identity + Microsoft Identity Manager) for SvK (~35,000 identities). Developed IAM integrations, maintained certificates and ADFS federated login, on a full Microsoft stack (Windows Server, AD, Entra ID, SQL Server, PowerShell).

IAM Specialist - Major Transport Authority

Technical implementation of Omada Identity: authorization process design, birthright permission modeling, lifecycle management analysis, and integrations with Active Directory, Entra ID, and Exchange.

IT Security Specialist - Government Agency

Security contact in a defence-industry software project - security requirements analysis, policy implementation, and security architecture responsibility, aligned to ISO 27000-series, NIST SP 800-53, and best practices.

IT Security Specialist - Government Agency

Hardened systems for security-sensitive operations: isolated environments, endpoint security measures, firewall configuration, central log management and domain group policy.

2020 – 2022

OVPN Integritet, Vilfo

Support Technician

Network troubleshooting across OpenVPN and WireGuard configurations on Windows, macOS, *nix, OPNsense, and pfSense. Issue replication via VM environments.

EDUCATION

2019 – 2022

Stockholm University

Bachelor of Science - BS, Computer and Systems Sciences

Bachelor's Thesis

Emerging information security challenges in augmented reality: Correspondence to the best practices of ISO 27002:2022

Project Management

Served as Scrum Master for a software development project integrating City of Stockholm open data.

COURSES & CERTIFICATIONS

2025

Microsoft

2025-03
SC-200: Microsoft Security Operations Analyst

2025-01
SC-900: Security, Compliance, and Identity Fundamentals
AZ-900: Azure Fundamentals
MS-900: Microsoft 365 Fundamentals

2023-04

ISC2

Associate of ISC2, CISSP

2022-09

Omada

Identity Foundation Training, FND100
Identity Workflows Configuration, CFG210

2022-08

Knowit / MSB

Swedish Civil Contingencies Agency methodology for information security

HIGHLIGHTED SKILLS

Cloud Security Operations

- Microsoft Sentinel, Defender XDR, Defender for Endpoint
- Log Ingestion, Forwarding & Data Collection Rules
- Detection Engineering, Rule Tuning & Threat Hunting
- Incident Response & Root-Cause Analysis
- MITRE ATT&CK
- SIEM / SOAR / EDR

Query, Scripting & Automation

- KQL (Kusto Query Language)
- PowerShell
- SOAR / Logic Apps playbooks
- Prompt Engineering & AI-assisted tooling development

Identity & Access Management

- Microsoft Entra ID (Conditional Access, Identity Protection)
- Active Directory / AD DS
- Identity Governance & Administration
- Omada Identity Suite
- ADFS / SSO
- MIM, Lithnet Autosync

Networking

- OPNsense / pfSense
- OpenVPN / WireGuard
- Firewall Log Forwarding & Network Telemetry

Endpoints, Servers & Infra

- Microsoft Azure (Log Analytics, Azure Monitor, RBAC)
- Microsoft Intune endpoint management
- Windows Server administration
- Proxmox virtualization

Security & Compliance

- Security Hardening (GPO)
- ISO 27001 & 27002
- NIST SP 800-53
- GDPR
